

## NEXT DRIVE FROM E.ON NEXT

Charge your EV with lower overnight energy prices.†

An EV home charger doesn't just spare you the hassle of tracking down a charging point, it also means you've got electricity on tap that's 50% per unit cheaper<sup>a</sup> on average than using a public charger.

But that's only half the story. With the Next Drive tariff from E.ON Next, you can charge your EV and enjoy lower overnight energy prices, equivalent to less than **2.5p per mile**.†

- ✓ Lower-priced electricity, 6.9p per kWh, when you charge between midnight and 7am
- ✓ 100% renewable electricity as standard\*
- ✓ Fixed energy prices for one year
- ✓ No exit fees

So whether you're using your EV to get to work, nip to the shops or just for zipping around at the weekend, you can do it all at a great-value price.

**e-on**  
**next**

Available to UK residents, excluding Northern Ireland, at Nissan dealerships only.  
†Average cost: to charge based on an electricity rate of 59.33p/kWh at a non-subscription public charger v average domestic rate of 22.26p/kWh under Ofgem's July 2024 price cap.  
†Equivalent to less than 2.5p per mile per kWh @ 6.9p per kWh. Lower priced electricity 6.9p/kWh when you charge between 12am and 7am compared to charging at 22.26p/kWh (national average and will vary by region) standard variable tariff rate.  
\*Electricity backed by 100% renewable sources. E.ON's renewable generation assets, agreements with UK generators and the purchase of renewable electricity from other sources. E.ON's smart meter that can send E.ON half hourly updates on your energy use required, where eligible. Exit fees and E.ON T&Cs apply.

## Charge easy. Pay monthly.

You can spread the cost of your E.ON Vestel home charger and installation with your Nissan monthly vehicle instalments. It's the safest, most affordable and simplest way to charge your Nissan EV at home. Speak to a member of the Nissan dealership team to find out more.

## E.ON NEXT VESTEL

### The affordable charging solution

E.ON Next's home charger makes home charging easy. Just plug in your EV overnight and it'll be raring to go in the morning, just like you. You can stay connected via the app<sup>A</sup> while you're on the go, and schedule your charging sessions for when it suits you best. It's easy to monitor with its clear, simple features, and there's a 24/7 customer helpline in case you need assistance.

### Charging at home safely

#### Why are 7kw home chargers better than 3-pin charging cables?

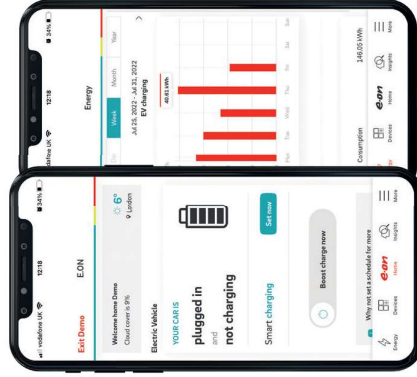

An EV home charger charges up to 3x faster, and gives access to a variety of smart features. Like being able to track your spending and set your charger timer for the cheapest off-peak tariffs.

#### Why do I need to install a 7kw home charger?

Dedicated home chargers are specifically designed to handle the load and the time periods that EV charging requires. They are installed on new electrical circuits and meet the evolving regulatory standards to guard against electrical risk. This makes 7kW home chargers a safer choice.

### Connect to your charger from anywhere with E.ON Home App

- ✔ Set charging schedules.
- ✔ Lock & unlock your charger remotely.
- ✔ Track energy consumption and costs.
- ✔ Manage multiple users.

- ✔ **Charging.** Up to 7.4kw of charging capacity.
- ✔ **Schedule charging remotely.** Set your car to charge at a time that is convenient to you most.
- ✔ **Smartphone app connectivity.** Control remotely and monitor or adjust energy usage, costs and energy supply<sup>A</sup>.
- ✔ **Dynamic power balancing.** Balance the energy usage between your EV charging unit and the rest of the electric appliances in your home.
- ✔ **Charge your way.** Choose between tethered or non-tethered to suit your needs.
- ✔ **Durable.** IP54, water and dust resistant, allowing for safe installation indoors or outdoors. Plus flame resistant 5VA plastic housing.

## GET YOUR HOME CHARGER FROM YOUR NISSAN DEALERSHIP

Pick up an EV charger with your Nissan Electric Vehicle

Four easy steps to order your EV charger.

1. **Purchase** a new or used Nissan LEAF, ARIYA or Townstar.
2. **Order** the Vestel EVO4 7.4kW home charger today from a Nissan dealership.
3. **Installation** of your new home charger will be completed by E.ON Next's specialist installers.
4. **Switch**, if you'd like to, to the E.ON Next Drive tariff where you can drive for less than 2.5p per mile<sup>†</sup>. E.ON will send you a reminder once your charger installation has been scheduled and you can compare to your current tariff.

Charge easy. Pay monthly.

<sup>A</sup>To be eligible for the E.ON Next Drive tariff you must have a smart meter that can send half hourly updates on your energy use. This is so E.ON can bill you for the right rate. † Full tariff details on back page

<sup>A</sup> Minimum requirements: iOS 11 or later, Android 7 or later...
